

SENTINAL SECURITY AUDIT REPORT

Target Scope: http://192.0.2.1:9999/test-unreachable | Scan Mode: STANDARD | Auth: DEV_MODE | Date: September 04, 2026 at 08:44 UTC

Security Score	DAST Coverage	Critical Flaws	High Flaws	Total Findings
61.7/100	40.0% (FAILED)	0	1	2

1. Target Connectivity & Blocking Diagnostics

Reachability	UNREACHABLE	TLS Protocol	HTTP (Unencrypted)
Application Access	BLOCKED	WAF / Bot Protection	None Detected
Finding Confidence	FULL	Coverage Status	FAILED (40.0%)

Recommendation: Configure an authorized scanner IP allowlist or provide an approved authenticated scanning configuration to achieve complete assessment coverage.

2. Executive Summary

****Security Assessment Executive Summary****

****Overall Posture:** ELEVATED RISK**

The assessment revealed notable security weaknesses across http://192.0.2.1:9999/test-unreachable, comprising 1 High and 1 Medium issues.

****Key Risk Highlights:****

- Total Discovered Findings: 2 (Critical: 0, High: 1, Medium: 1, Low: 0)
- Correlated Exploit Chains: 0
- Primary Concern Areas: Cryptographic Failures, Network Availability

Leadership is advised to authorize immediate sprint allocation for remediation of critical issues and enforce automated security gating in CI/CD pipelines.

4. Prioritized Vulnerability & Threat Inventory

Severity & Risk	Engine	Vulnerability & Threat Scenario	Location & Remediation
HIGH Risk: 86.2/100 Blast: Information Disclosure &	WEB DISCOVERY	Target Host Unreachable Threat: The vulnerability exposes implementation details, internal software versions, or unhardened endpoints that assist attackers in reconnaissance and multi-stage attack chaining...	http://192.0.2.1:9999/test-unreachable Fix: Verify target DNS, firewall ingress rules, and that the web service is actively running...
MEDIUM Risk: 49.9/100 Blast: Defense Degradation & Tr	SSL TESTSSL	TLS Connection / Certificate Validation Error: 192.0.2.1 Threat: Missing transport or browser security controls allow adversaries on adjacent networks or untrusted origins to intercept cleartext communications, frame the application in Clickjack..	/ Fix: Ensure the host has a valid TLS certificate issued by a trusted Certificate Authority...

5. Strategic Remediation Playbook

****Step-by-Step Remediation Actions:****

- ****Network Availability:**** Verify target DNS, firewall ingress rules, and that the web service is actively running.
- ****Cryptographic Failures:**** Ensure the host has a valid TLS certificate issued by a trusted Certificate Authority.
